INSTITUTE FOR SUCCESSFUL LEADERSHIP, INC.

Ordinary People Doing Extraordinary Things

UNIVERSITY/ORGANIZATION AFFILIATION

All Campuses, Nationwide

CBO SOUTHERN ALLIANCE 2.0 SUPPORT

ISL combines underpinnings and current events to allow technical assistance and capacity-building to provide instruction for organizations. ISL exposes organizations to resources to integrate data- and community-driven program designs and reflect socio-environmental factors influencing community health risks. ISL brings its approaches to community composition and outreach, multi-sectoral collaboration, social determinants of health, communication, and education and instruction to insure information is translated to CBOs. Collaborative interactions with CBO partners insure technical assistance is customized to meet organizational and community needs and build leadership to sustain organizational relevance in the future.

BIOGRAPHY

The Institute for Successful Leadership (ISL) celebrates 26 years of providing consultation empowering vulnerable communities worldwide towards comprehensive health promotion, disease prevention, risk reduction, and health equity. ISL offers a blend of expertise from three consultants to tailor technical assistance and capacity-building to meet the needs of communities and systems that serve them. ISL's guiding assertion contends that if communities' disease risks derive from individual behaviors and socio-environmental sources, then protective factors can also emerge from these sources. ISL technical assistance and capacity-building partners can anticipate interactions to share information and instruction, devise program designs to meet Black communities' needs in their locales, and create evaluations that contribute to communities-at-large and organizational strength.

PUBLIC HEALTH EXPERTISE

Dr. Tralonda Triplett is an Epidemiologist and Public Health Ethicist. ISL has 26 years of expertise in public health program design, implementation, training, evaluation, and research.
