

# OD2A STAFFING SUPPORT

*Partnering for Impact. Staffing for Change.*

## What Drives Our Workforce Impact?

### Workforce Development

Expanding public health capacity through recruitment, training and field support.

### Training and Technical Assistance

Delivering tailored learning opportunities to enhance program impact.

### Performance Monitoring

Supporting jurisdictions in tracking progress and identifying improvement areas.

### Impact Evaluation

Measuring the effectiveness of overdose prevention and surveillance strategies.

## WHO WE ARE

The Overdose Data to Action (OD2A) Staffing Support Program, led by the CDC Foundation partnering with Centers for Disease Control and Prevention's (CDC's) Division of Overdose Prevention, supports OD2A in States and OD2A: LOCAL by placing skilled professionals in high-need areas to reduce overdose deaths and strengthen local capacity.

Since its inception, this program has supported more than 200 field employees in 45 jurisdictions, helping partners expand surveillance systems, deliver harm reduction services and connect people to care.

## WHAT WE DO

- Hire, train and retain qualified field employees
- Expand overdose surveillance and response infrastructure
- Drive data-informed prevention strategies
- Integrate people with lived and living experience (PWLLE) into local systems
- Strengthen cross-sector collaboration
- Support long-term staffing sustainability

## WHAT WE OFFER

- Flexible staffing tailored to your needs
- A collaborative Request for Application and recruitment process
- Ongoing technical assistance, training and peer learning
- Access to a national community of practice
- Clear onboarding, supervision and planning support

## THE CDC FOUNDATION ADVANTAGE

### Attracts Top Talent

Our strong reputation and name recognition draw highly skilled and qualified candidates, ensuring access to the best talent available.

### Comprehensive Staffing Solutions

Competitive pay, benefits and development opportunities.

### Proven Hiring Power

More than 6,000 positions filled since 2021.

### Flexible and Fast

We adapt quickly to meet your needs.

### Deep Public Health Expertise

Trusted nonprofit with extensive health department partnerships.

### Cost-Effective

Our margins are lower than traditional staffing agencies--under 20 percent.

**AN OVERDOSE  
DOESN'T MEAN  
IT'S OVER**

# OD2A STAFFING SUPPORT

*Partnering for Impact. Staffing for Change.*

## OUR HIGH-LEVEL PROCESS

### Initial Engagement

We work with jurisdictions to assess needs, identify position types and outline vision and jurisdictional priorities.

### Recruit and Hiring

CDC Foundation leads the recruiting and onboarding process in coordination with jurisdictions.

### Agreements and Contracts

We execute the Master Services Agreement (MSA) and required jurisdiction-specific agreements to formally initiate staffing support and outline terms of collaboration.

### Seamless Onboarding:

We handle all aspects of onboarding, including training, equipment setup, orientation and access to local systems.

### Ongoing Support:

We conduct regular check-ins, trainings, data collection and evaluation, while fostering peer learning and collaboration opportunities.

## PARTNER TESTIMONIALS

“The CDC Foundation employees have played a critical role in increasing our jurisdiction's capacity to meet Overdose Data to Action (OD2A) requirements by expanding direct service outreach, improving care coordination and increasing data-informed engagement strategies.”

Kentucky River District Health

“CDC Foundation has always been instrumental in addressing the large number of cases Los Angeles County receives on a regular basis, helping to meet the deadline without sacrificing the quality of our abstractions.”

Los Angeles County Department of Public Health  
Substance Abuse Prevention and Control

## LET'S BUILD THE FUTURE OF PUBLIC HEALTH TOGETHER

Strengthen your overdose prevention efforts with our dedicated staffing support. Let us connect your jurisdiction with qualified field professionals to expand capacity, enhance data-driven decision-making and drive lasting impact in communities affected by the overdose crisis.
