City of Manchester, New Hampshire Neighborhood Health Improvement Strategy

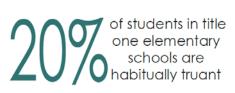

City of Manchester Health Department Granite United Way

Manchester, NH - Mid-Sized Urban Community

2 OUT OF 3

center city residents feel that there are people in their neighborhood who might be a bad influence on children

students are enrolled in the federal free meals program

housing units were built before 1950 half are renter occupied

Other Health Risks Associated with Impoverished Neighborhoods

Violence Increased Disease Mortality

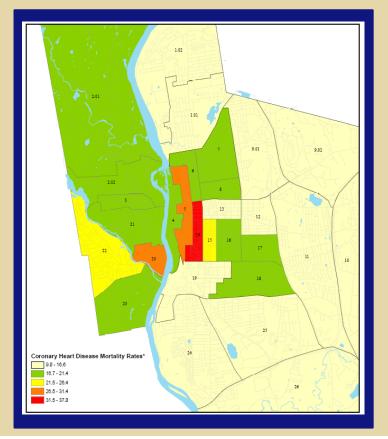

Need for Sub-Geographic Data

Age-Adjusted Coronary Heart Disease Mortality by Census Tract

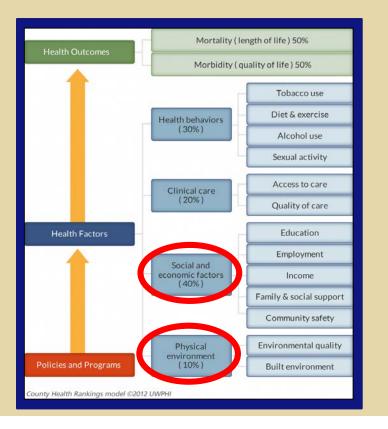

1995-2005

Rate differences due to neighborhood poverty or deprivation

Social Determinants of Health Approach

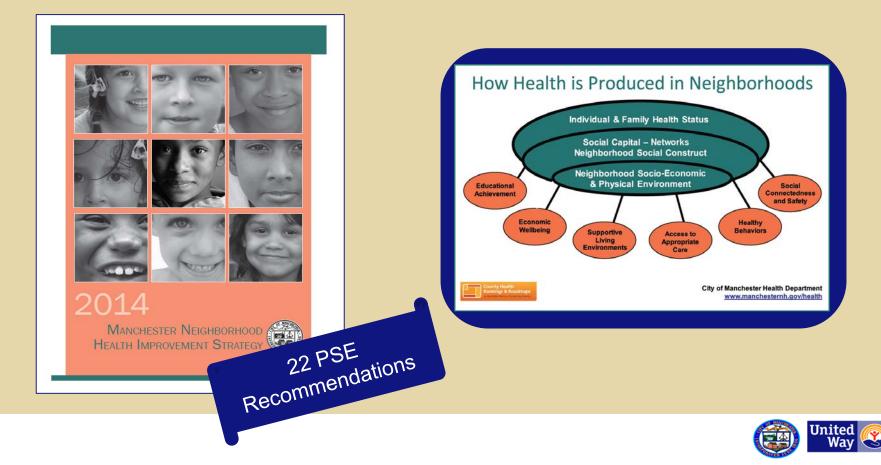

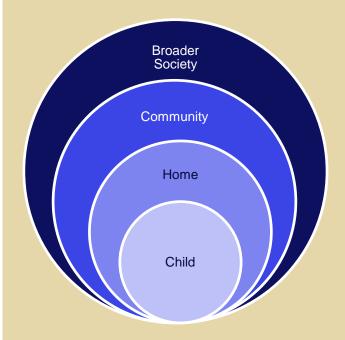

Neighborhood Health Improvement Strategy

Engaged Philanthropy: Community Impact Redefined

Improving Childhood Resiliency to Toxic Stress

Invested in the implementation of childhood resiliency curriculums in two Community Schools, reaching over 1,000 students.

Building Adult Capacities

Invested in partner agencies to bring parent education, financial literacy, resident leadership development and employability training to Community Schools.

Connecting Families to Critical Community Supports

Invested in "Family Success Coordinators" for Community Schools to connect with families in addressing chronic absenteeism and provide mental health/behavioral health supports.
