**Brian Anderson, MD**  
*Chief Digital Health Physician*

**Geralyn Miller**  
*Senior Director*

# WAverify

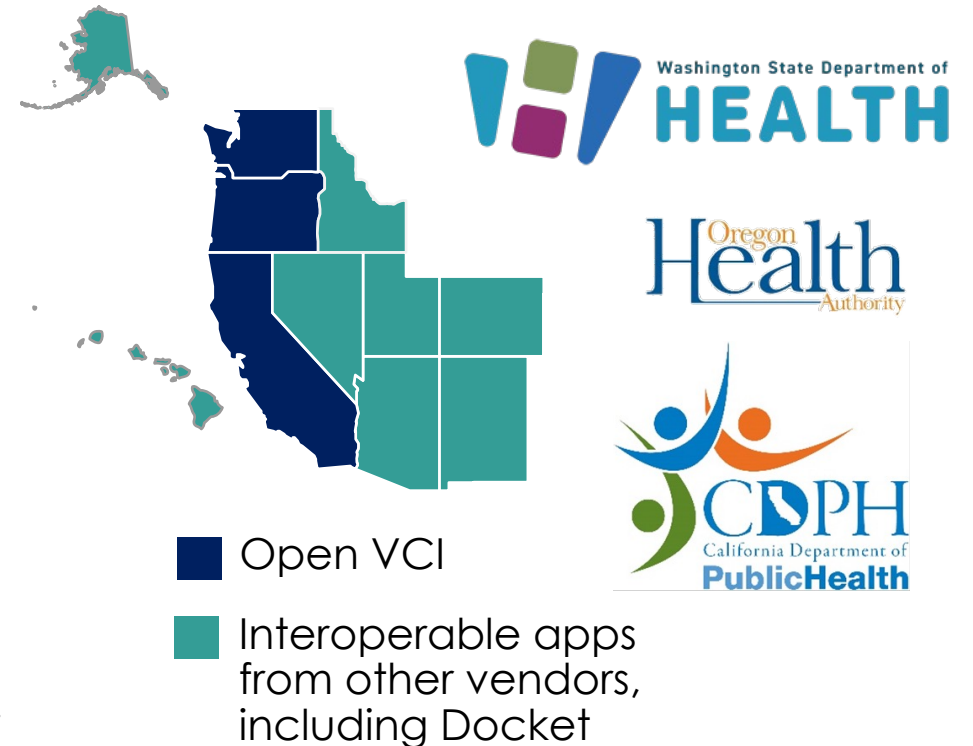

---

- Digital vaccine verification in Washington State using SMART Health Cards
- Rapid development deployment and testing
  - Aug/23/2021 – Oct/25/2021 (eight weeks)
  - “Soft” launch on October 25 in English only, additional languages added within weeks
- Nearly 2 million verifications since launch
- Now adding more: WAverify+

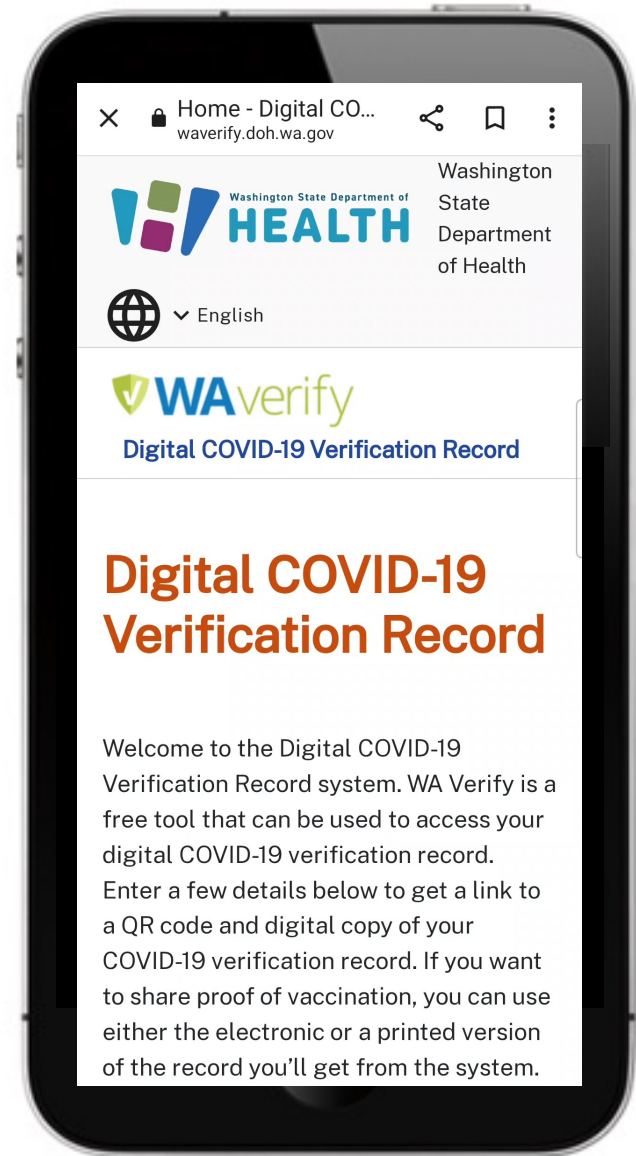

# Collaboration and Partnerships

- Multi-state collaboration with California, Oregon, and Washington
  - Leveraged the sharable components and reusable code with github repository
  - Shared configurations, lessons learned, enhancements, and approaches
  - Model for future projects
- Successful Public-Private-Academic partnership
  - MITRE, Microsoft, MS Research, Deloitte, University of California, University of Washington, State Public Health Departments
  - Safety check and code review from MITRE Corporation

# Multi-Language Accessibility

- Offered in over 42 languages
  - *The most of any Verifiable Clinical Information (VCI) issuer*
- Automatic browser language detection

# Integration into Smartphones and Printed Cards

• Demoad at HIMSS23

**COVID-19 Vaccination Record Card**  
Please keep this record card, which includes medical information about the vaccines you have received.

 **HEALTH**

Bring this vaccination record to every vaccination or medical visit. Check with your health care provider to make sure you are not missing any doses of routinely recommended vaccines.

For more information about COVID-19 and COVID-19 vaccine, visit [cdc.gov/coronavirus/2019-ncov/index.html](http://cdc.gov/coronavirus/2019-ncov/index.html)

You can report possible adverse reactions following COVID-19 vaccination to the Vaccine Adverse Event Reporting System (VAERS) at [vaers.hhs.gov](http://vaers.hhs.gov)

# WAverify+ SMART Health Links

- International Patient Summary (IPS)
- Patient directed key verifiable clinical data for travel
- Embedded URL in a QR code that links to data and/or FHIR endpoints

[Demo](#)

# WA Verify+ IPS

**Test System - no protected health information**

The WA Verify+ system enhances the WA Verify COVID-19 vaccination verification system which, since 2021, has allowed people receiving COVID-19 vaccinations in Washington State to access and share that information using SMART Health Card QR codes.

WA Verify+ allows people to access augment, and electively share their own health data using the Intternational Patient Summary (IPS) standard. IPS data include important clinical data, immunizations, advance directives, and other data useful for urgent medical care. This data may be helpful to those traveling, to parents or caregivers, and to anyone who wants to be able to see their own records, or securely share their data with healthcare providers or others of their choosing. WA Verify+ uses the secure, patient-controlled SMART Health Link (SHL) standard to allow people to share information collected and stored on their behalf by the Washington State Department of Health.
